

Strengthen research infrastructure:

Develop a research library with a wide range of resources, including books, journals, and electronic databases.

Provide easy access to university and our sister institute research facilities and equipment.

Principles

Create a research culture that promotes collaboration and interdisciplinary research. Research conducted by the institution should be relevant to the needs of the community and the nation. It should also be aligned with the institution's mission and vision.

Promote research among students and community. Research conducted by the institution should have a positive impact on society. This means that it should be disseminated to the public and used to inform policy and practice.

Research conducted by the institution must be of the highest academic rigor. This means that it must be based on sound theoretical and methodological foundations, and that it must be conducted in a systematic and ethical manner.

In addition to the above, the following specific initiatives have taken to strengthen research:

Developed a mentorship program for research scholars: In this programme research scholars are provided opportunity to interact with with experienced faculty members who can provide them with guidance

and support. The mentorship program would help research scholars to develop their research skills and to successfully complete their research .

Organizeworkshops and seminars on research topics: These workshops and seminars provide research scholars and faculty members with an opportunity to learn about the latest research trends and methodologies. They are also provided with a platform to present their work and to receive feedback from other experts.

Endeavours in Education

Frontiers in Education is a peer reviewed journal on Education, Published by the college. Currently publishing biannually.

The editorial board of Frontiers in Education should be expanded to include scholars from a wider range of disciplines. This would help to ensure that the journal publishes research on a broad range of topics in education.

Research Extension Activities [REA Project]

The REA project should develop a comprehensive plan for disseminating and extending its research output to the community and national development. This plan include a mix of strategies, such as workshops, seminars, publications, and social media.

The REA project partner with community and organizations like CTEF,CEAM to disseminate and extend its research output. This would help to ensure that the project's findings are used to address real-world problems and needs.

News Letter

Every year Centre for Research and Development is publishing a News letter. The department s planning to expand its scope to include more articles on a wider range of research topics. This would make it more appealing to new researchers.

Financial Assistance

The College is committed to supporting research and innovation. However, the College currently does not provide any incentives or fellowships other than those provided by NCERT or other national or state funded agencies.

The College is providing training and support to research scholars on how to write grant proposals.

At present, the College does not provide any seed money projects to students or faculty. However, the College does help financially poor research scholars through the edu-support project.

The College has started to develop a system for allocating internal funding to seed money projects and fellowships.

. The College should explore ways to partner with businesses and other organizations to provide funding for research.

Conclusion:

This institutional research plan outlines the strategies and action plans for NVKSD College of Education(Autonomous) to become a leading research centre in teacher education and related fields. The plan is based on the vision and mission of the institution to provide an enabling

environment for research scholars to pursue their research interests, and to facilitate the dissemination and utilization of research findings. The successful implementation of this plan will help the institution to achieve its goal of becoming a leading centre of excellence in research and teacher education.
